

the focus on human elites
genius is

of a scapegoat/preference
of deference towards
acknowledging & responding with your own.
One can reply with none, rather
than fear & desperate hope in a
mimicry-parallel way of
defending our attackers of universal
trust. Disparaging one another
in favor of championed individuals
be they wealthy "others", spirit
influenced actors or overexaggerating
passion-charismatic characters born
of the system fabled to create them
we are all studying to practice
care. The challenge? Identification
emphasis. When I observe
myself or another emphatically
starting ~~that~~ ^{give} "I don't care" belief,
I simply wonder what do we
wish to protect so demanding ly
that we push immediately, attempt to
convince oneself none rather of
the denial of ^(require) our humanness.
